IEEE WIE MSIT in collaboration with AVENSIS'20- The Technical fest of MSIT organized a hackathon, **Hack-Xpress** on **8th -9th January, 2020** where students with different mindsets come together to use tech to hack into real world problem to solve them in a better way . The sole purpose of the event was to create a usable software based on the theme provided. The event was divided into three different phases- Online Registration, Building of Project and the final presentation.

Breezing through GSoC

Event Details

Date: January 28th,2020

Time: 10 am to 12pm

Venue: Seminar Hall

IEEE WIE MSIT organized an event **Breezing through GSoC** covering what?, when? and how? of Google Summer of code 2020 on January 28th,2020. Former GSoCer Mr. Sanyam Dogra, student of MSIT was invited as the chief speaker to guide the aspiring students. GSoC involves various open source organizations which are affiliated to Google. The shortlisted candidates can contribute to various domains of the open source platforms like we development, app development etc. The event started with an introduction to the GSoC followed by several guidelines given to students like advantages of active GitHub profiles, exposure of working in different environment and with different people. GSoC 2020 timeline was also made known to the students. Mr. Sanyam Dogra also shared his experience of working with 'Developers Italia' , as a GSoCer in 2019, where he worked to complete the 'React Web Kit'. At last token of reverence was given to the speaker by the Branch Counselor Dr. Anupama Kaushik.

Attendees

The seminar hall was fully packed with more than 100 students in the seminar.
