### Day 1 (6<sup>th</sup> Dec., 2021)

The first session started with the **Introduction to Internet of Things** by **Dr. Md. Iftekhar Hussain** on 6-12-2021. Dr Hussain is currently working as an Associate Professor in Department of Information Technology at North-Eastern Hill University, Shillong, Meghalaya. The session was facilitated by Ms. Sonika Malik and the speaker initiated with the background of IoT that includes IoT Architecture, IoT protocol stack, Next-Gen IoT. He also explained the challenges and research opportunities in IoT like Heterogeneity, Scalability, Interoperability, Security and Privacy, Quality-of-Service, Machine Learning etc. The talk of session-1 was concluded with a glimpse on IoT Testbed.

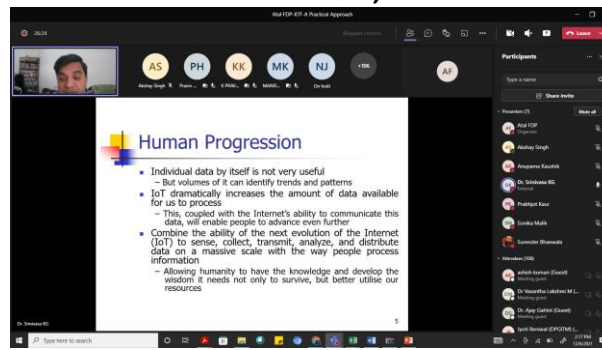

The speaker for the second session was Dr. Kamaljit Singh Saini, Professor, CSE Department, Chandigarh University, Punjab. Dr. Saini guided us about IoT Sensors, Actuators and Protocols. The session was facilitated by Mr. Akshay Singh and the speaker initiated with the history and definition of IoT. Dr. Saini walked us through the characteristics, structure and architecture of IoT. He delivered the talk in depth on IoT Sensors, Actuators and Protocols. The session was concluded with the threats in the field of IoT.

The session-3 was very well explained by Dr. K G Srinivasa. He is currently working as a Professor at NITTTR, Chandigarh, Punjab. The topic for this session was Research Directions and Challenges in the field of Internet of Things. Dr. Srinivasa initiated the lecture with the introduction to Node-Red and NPM. He beautifully elaborated a Demo on Tracking Space Station on Map using Node-Red. The last session of Day-1 of ATAL FDP ended well with a vote of thanks to all the eminent speakers and participants who made all the sessions very interactive and fruitful.

### Day 2 (7<sup>th</sup> Dec., 2021)

The first session was conducted by Prof. G. K. Srinivas, Professor, NITTTR, Chandigarh. His topic was Introduction to IoT based simulation tools. In this session he gives the exposure to various IoT based simulation tools.

Dr. Nikhil Marriwala Assistant Professor and Head of the Department Electronics and Communication Engineering Department, in University Institute of Engineering and Technology, Kurukshetra University was the eminent speaker on day 2 session 2. He discussed about the Labview fundamentals and he took various examples for hands on experience on that tool. He also discussed about fuzzy logic concepts and IoT enabled AI fuzzy based Green house controller.

Prof. Kamaljit Singh Saini professor and research coordinator AIT-CSE Department, University Institute of Engineering, Mohali, was the eminent speaker on day 2 Session 3. He discussed about IOT Design & Methodology: A hand-on Approach with Arduino and Sensor. He took various examples to explain the concepts and to provide in depth information about Arduino and sensors. All the sessions were very interactive and informative.

### Day 3 (8<sup>th</sup> Dec., 2021)

The speaker of the first session was Dr. Debashis De. He is Professor, in the Department of Computer Science & Engineering and Director of School of Computational Science in Maulana Abul Kalam Azad University of

Technology, Kolkata., West Bengal. His research interests include Mobile Edge Computing and IoT. His H index is 33 and citations are 4500. The topic of session was “Cloud, Fog and Edge Computing”. This session was attended by 90 participants. In the beginning Dr. Debashis De gave the detailed introduction on IOT and what is the relation between IOT and cloud computing. After that he explained Cloud, Fog and Edge Computing. And on Edge Computing he defined the Drone functionality with internal structure as well as he explained the algorithm used behind that. He also explained Mobile Edge Computing with examples and had a wonderful question answer session. As per the feedback received from the participants it was very good learning experience, the lecture helped them in their understanding the Cloud, Fog and Edge Computing.

The Speaker for session 2 was Prof. Amit Prakash Singh. He is working as Professor at University School of Information, Communication & Technology, Guru Gobind Singh Indraprastha University, Delhi. He has research experience in Artificial Neural Network, Machine Learning and Digital System Design. He has published approximately 60 research paper in Scopus Indexed Journal and conferences. The topic of the session was “Application of IOT in agriculture”. He discussed about deep learning challenges and Popular approaches for implementation of deep learning. He also talked about his research paper where he created a mobile application to classify and identify tomato plant successfully.

The Speaker of session 3 was Dr. Lalit Kumar Singh. He is a Scientist in Department of Atomic Energy, NPCIL-BARC Government of India, since 20 years, and has distinction of working on Pressurized Heavy Water Reactors(PHWR) and Light Water Reactors (LWR). His Research Interests includes Software Engineering, Software Reliability, Networking, Data Structures, Image Processing, System Reliability, System Safety and Mathematical Modeling. Sir has published around 50 journals and many conference papers. The topic of the session was “Reliability analysis of IOT communication protocol for safety critical systems”. He has explained about the reliability prediction of safety critical system with the help of case study.

**Day 4 (9<sup>th</sup> Dec., 2021)**

The 1<sup>st</sup> session on the topic “Cloud-based Real-Time IOT Design using LabView ”was held on Dec 9, 2021, at Microsoft Teams as a part of the ATAL Faculty Development Program. Ms. Preeti Rathee facilitated the session, and the speaker of the session was Dr. Nikhil Marriwala, HOD, ECE, UIET, Kurukshetra University, Haryana.

The session focused on cloud computing and how we can use it to benefit ourselves. Cloud computing refers to a flexible way of delivering hardware, software, or data resources via the network at a user’s request. This is opposite to the use of running a software application on a local computer. As we continue to investigate how our new technology era is growing, the societal benefits of a cloud-based system are constantly revealed. This development is growing exponentially as ever more complicated applications are released from use in a single physical place. Certain factors should be weighed when selecting a cloud service provider. Though cloud-based systems are usually based on a pay-per-use approach, various providers frequently have pricing schemes that must be considered. The topic of building an application was deeply explained by Dr. Nikhil. Applications are called Virtual instruments. This all sums up the Cloud-based Real-Time IoT Design using LabView and how we can use LabView to build an application and use it effectively.

The speaker for 2<sup>nd</sup> session was **Dr. Anju Bala**, Associate Professor, CSE Department, Thapar University, Patiala. She guided through the concepts of **Big Data**, **Cloud Computing**, and **Hadoop** throughout the session. The session commenced with a brief overview of **Big Data analytics** and an Introduction to Cloud Computing. **Cloud computing** is the delivery of different services through the Internet. These resources include tools and applications like data storage, servers, databases, networking, and software. Some of the popular **cloud services** are Google Cloud, Amazon Web Services, Microsoft Azure, and IBM Cloud. Dr. Bala enlightened the audience by revealing that IIT and Thapar university have their personalized cloud. **Baadal**, the **Cloud of IITD**, has 10 TB of virtualized storage and 32 blade servers.

Dr. Bala threw light upon some major Big data challenges such as Load Balancing. **HAProxy(High Availability Proxy)** is used to handle sudden load surges, higher resource utilization, and failure of servers. The purpose and working of HAProxy were explicated impeccably by Dr. Bala. The Implementation and Experimented results were illustrated and unraveled as well.

Eventually, the concept of **Hadoop** was put across by the speaker. Apache Hadoop is an open-source framework used to efficiently store and process large datasets ranging in size from gigabytes to petabytes of data. The points of **HDFS(Hadoop Distributed File System)**, properties of HDPS, implementation, and instances were unfolded by Dr. Bala.

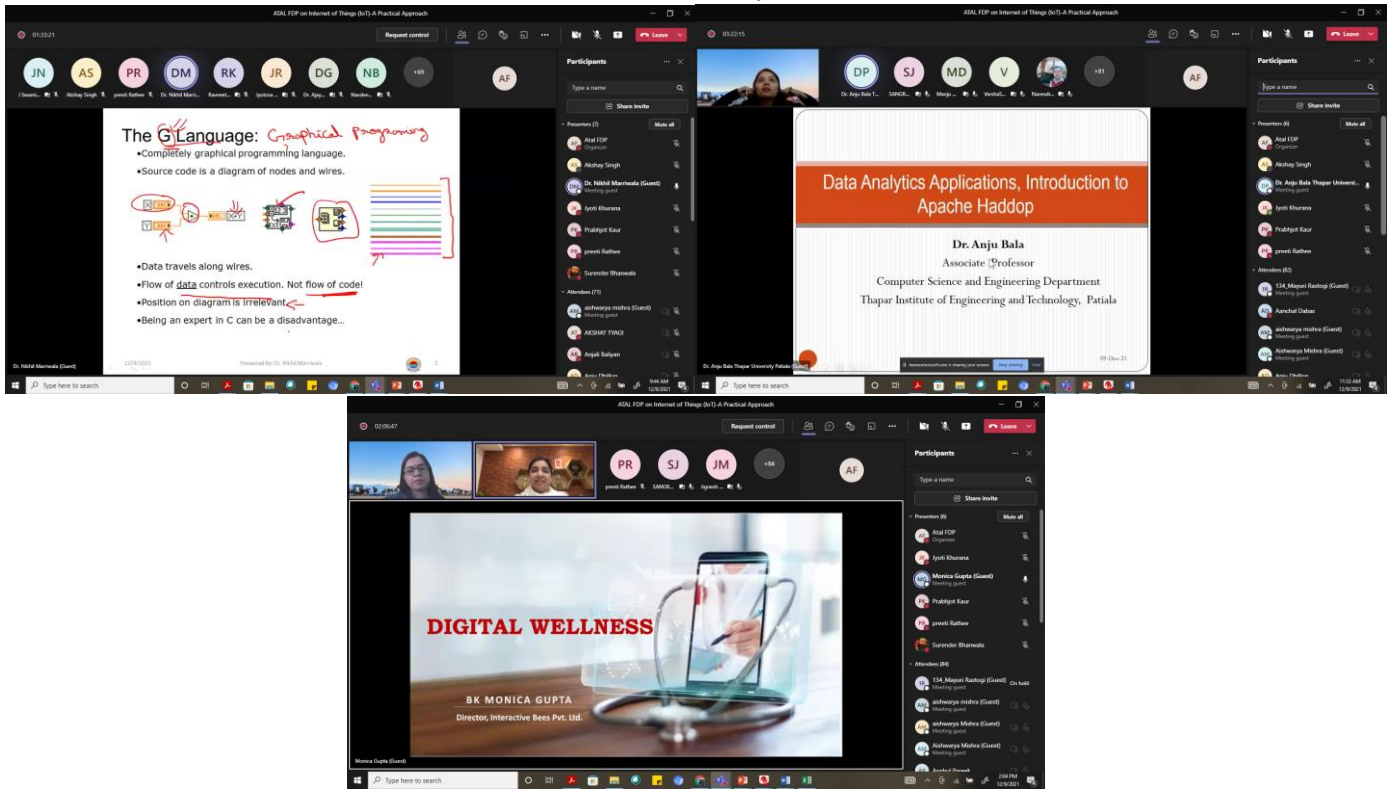

After completing the shared presentation, Dr. Bala shared a video of an IoT project, **Pothole detection**.

Session 3 was a beautiful session by **Sister Monica. Ms. Jyoti Khurana** facilitated the session. The sole purpose of the session was to make people aware of the harms/negative effects of OVERUSE of digital technologies. The sole aim is to help all of us live a meaningful and happy life governed by our own will. As we know that we are surrounded by all manner of technology. From our personal laptops, tablets, and phones. Technology is here to stay and help people make their life easy, but it’s always morphing and expanding. As each new technology enters the scene, it has the potential to improve lives if we use it in a wise manner. But, in some cases, it also has the potential to negatively affect physical and emotional health. According to many studies, this has been stated that nowadays, we people are addicted to technology, and that causes a lot of negative effects on our mental, emotional and physical health.

This all sums up the ill-effects of technology as a whole and how we can overcome the addiction we are having towards it, even though we can’t deny the fact that technology is an essential part of our life. So, one must balance their social life.

## Day 5 (10<sup>th</sup> Dec., 2021)

Both the sessions on the last day were conducted by Mr. Umang Kejriwal, Managing director in Phinland labs, Gurugram Haryana. He has experience in the field of “Robotics & Embedded System, Android App Development, Web Development, Python, Data Science, Machine Learning, AI, Deep Learning and Internet of Things” for more than 7 years. In first session he discussed about IoT Design and Methodology: A hand on Approach with Raspberry Pi and sensors. It was very interactive session. The second session was continued by Mr Umang Kejriwal and in this session he discussed about Demo of ThingSpeak Cloud and its integration with ESP8266. He explained the basic concepts of Clouds and Demo of ThingSpeak cloud and its integration with ESP8266.

### Valedictory Session

At the end, at 2 pm, feedback session was conducted by the coordinator of the FDP, Dr. Prabhjot Kaur. Many participants gave the feedback and asked queries about the test. At the end the coordinator gave vote of thanks to the participants, management, director of the college and the organizing team.
