

On March 11, 2025, 43 enthusiastic students from Btech all branches of Maharaja Surajmal Institute of Technology (MSIT) participated in an industrial visit to **Gridcon 2025**. This event, organized by the Power Grid Corporation of India Limited (POWERGRID), was held at the India International Convention & Expo Centre (IICC), Yashobhoomi, Dwarka, New Delhi, from March 9 to 11, 2025.

The visit was coordinated by **Dr. Jyoti Jain (Associate Professor, EEE Department, and Chapter Advisor, IEEE PES MSIT)**, along with IEEE, IEEE WIE, and the EEE department. It provided first- and second-year students with a unique opportunity to explore advancements in **grid technology and renewable energy solutions**. They engaged with industry experts, attended insightful sessions, and witnessed cutting-edge innovations firsthand.

Experiences like these bridge the gap between academic learning and real-world applications, inspiring the next generation of engineers to contribute to a sustainable energy future.
