

Emerging tech

Date: 12 September 2025

Time: 9 AM – 10 AM

Venue: Seminar Hall 406, MSIT

The Indian Society for Technical Education (ISTE) in collaboration with Prakriti has successfully organized a guest lecture on “Emerging Tech”. The event was aimed at providing students with valuable insights into the fast-evolving fields of Artificial Intelligence (AI), Machine Learning (ML), and software development. The session featured Ms. Pooja Sharma, Software Development Engineer at Microsoft, who has 15+ years of experience in the software industry. She is an ML expert and has previously worked at Cisco.

Session Highlights

1. Professional Journey: Ms. Sharma spoke about her career path from Cisco to Microsoft.

2. AI & ML Impact: Discussion on how these technologies are transforming healthcare, finance, and education.
3. Career Guidance: Practical advice on skills to develop, projects to pursue, and industry readiness.
4. Interactive Q&A: Students actively participated and clarified their queries with the speaker.

Key Takeaways

1. AI & ML are key drivers of digital transformation.
2. Continuous learning & hands-on practice are essential for growth.
3. Real-world applications > theory – focus on solving practical problems.
4. Networking, curiosity & resilience are vital for a strong career in tech.

Conclusion

The event was a resounding success – it was insightful, interactive, and motivating. Students walked away with a clearer vision of future opportunities in tech and a renewed drive to innovate. Special thanks to Ms. Pooja Sharma for her valuable time and to the ISTE x Prakriti MSIT team for organizing this impactful session.
